

## English Saddles Custom Designed By FORESTIER

Lynn Palm and Cyril Pittion-Rossillon of Palm Partnership Training® have partnered with Forestier, one of the oldest and most respected saddle makers in France to design a unique Hunt Seat saddle. Lynn and Cyril have experienced many challenges in finding the right English saddles to fit Quarter Horses, Appendix Quarter Horses, Paints and other stock horse breeds. Most saddles were too narrow, pinched the horse's shoulders, slid back or were truly unbalanced. Lynn and Cyril felt a strong need to conceive a saddle that would accommodate the build of this type of horse.

The **Alliance Hunt Seat** boasts an innovative tree design that is the first of its kind offered on the market. The new "**English Stock Horse Tree**"™ is specifically shaped so the saddle can rest absolutely level on the horse's back offering the rider perfect balance and the horse ultimate freedom of movement! This special tree design also allows the front panels to contour perfectly to the wide and round shouldered horse. With the panels resting flat on the shoulders, the pressure is distributed evenly from top to bottom providing the horse with maximum comfort. **Alliance Hunt Seat** offers several features:

- Small, even depressions in the front panels to mold around the bulk of the shoulders
- Tapered middle paneling to increase saddle closeness and stability
- Wide gullet to allow plenty of clearance for the spine
- Three different levels of thickness in the back paneling to maintain the saddle balance for all shapes of the horses' top lines
- Girth attachment set back to secure the saddle in place
- **Alliance Hunt Seat** saddles are handmade and of the highest grade of French leather to provide the rider with the greatest comfort and durability

**Sizes:** 16" 16.5" 17" 17.5" 18" 19"
